

SS3

Medium Maturity Sudangrass

Brachytic dwarf trait provides stout stalks for excellent standability, excellent for dry hay and rotational grazing, dry stalk for quick dry down, exceptional re-growth and BMR-6 for high digestibility

55-65 Days to Boot

22-25,000 Seeds/Lb

Yield for Maturity-1

Forage Quality Potential-1

Palatability- 1

Digestibility - 1

Seedling Vigor - 2

Recover After Cutting - 1

Plant Uniformity - 1

Standability- 1

Downy Mildew - 4

Anthracnose - 4

Wet Soil Tolerance - 5

Fusarium Wilt - Not rated

Silage Use- 2

Dry Hay - 1

Continuous Grazing - 3

Rotational Grazing - 1
